## WORK EXPERIENCE

### Konica Minolta Business Solutions, Ramsey NJ

IT & Security Intern: 6/5/17 - 8/11/17 • 5/30/18 - 8/16/18

- Create remedy tickets for new devices to be deployed to users
- Organize data received from security spreadsheets
- Organize received devices from users and record inventory
- Re-image servers and laptops for redeployment
- Send out and organize received laptop user agreements from users
- Set up desktops for users
- Train other interns

Web Services Intern: 6/10/19 - 8/16/19

- Worked within current projects under a CVS source control system to edit aspects (forms, database schema and population) of employee website through use of HTML, CSS, JavaScript, Java (JSP), & SQL
- Given free reign to update Supplier Solution Catalog website to feature a modern and user-friendly design
- Worked well with other developers and project managers to understand and fulfill business requirements in a timely and efficient manner

## PROJECTS

### BarryBot:

- Discord chat bot made with discord.js (hosted on GitHub, deployed with Heroku)
- Has unique responses for specific server members
- Can assign roles and remove roles from server members
- Can kick users upon command
- Can "flip a coin" and "roll a dice"

### Gif Charades:

- Officially on the Discord Bot Store
- Discord chat bot made with discord.js (hosted on GitHub, deployed with Heroku)
- User starts game with the command '/gc play'
- Bot then gives a random question with 4 parameters: type of media (movie, song, etc), number of gifs, number of words in the media's title, and the gifs themselves
- User can receive a hint with the command '/gc hint'

### DCEU/MCU Database:

- Final group project for graduate course CS 546: Web Programming
- Database for DC Extended Universe & Marvel Cinematic Universe characters
- Responsible for HTML, CSS, and client-side & server-side JavaScript for user database system, search results, character details, security, and admin user features
- Tools used: Express, Handlebars, MongoDB
